

FULL-SERVICE HOSTING / MAINTENANCE PACKAGES

CryoDragon is a full-service creative studio, meaning we can help with your website from creation to launch and continued support. We can manage your web hosting alone, manage just your website, or manage both for you. At CryoDragon, we have clear criteria for each of our hosting and/or maintenance packages. We also offer customized maintenance packages if you are looking for something more robust or unique.

Please note that any additional work done outside of those specified in each package will be charged at our hourly rate of \$80 + HST.

 The Sky is the Limit!
 (Let Us Know What You Need)

THE MORE FEATURES YOU WANT, THE MORE YOU SAVE!

All website hosting management and website maintenance packages are billed on an annual basis unless alternate arrangements are made between CryoDragon Inc. and The Client.

CryoDragon Inc. does not provide web hosting services, but rather web hosting management services - that means we take care of everything related to your web hosting if you do not want to deal directly with a web host provider. If you choose any of our maintenance packages that include domain/hosting management, this covers the cost of our services in providing you support and being the primary liaison between The Client and The Client's web host provider. CryoDragon Inc. is not responsible for any server issues outside of our control.

CryoDragon recommends the following global web host providers: GreenGeeks, HostGator, GoDaddy, and A2 Hosting.
